Monthly Engineer's Report

Township Engineer John Segursky, P.E., reported on the Linnippi Village Road Project and the way it is to be bid out. He explained the bidding process, which is done electronically through PennBid, noting it is a sealed bid process, and at the meeting John will login to the PennBid account and unseal the bids at the township meeting.

The project is being bid out in nine different bids allowing the township to tailor the project based on what they select as a priority. If the bids are high the Supervisors may choose to do only 75% of the project and would be able to do that and award the project based on getting as much of the project completed within the Township's budget.

John asked the Supervisors if they had any additional comments or concerns about the project to be addressed, and if not, the bid package will be put together so the project can be placed out for bid at the April meeting. He said the project will be bid out in sections so the Board can "mix and match" the project that best fits the township's needs and budget.

Supervisor Calhoun made a motion to advertise for bids for the Linnippi Village Road Project on PennBid and schedule the bid opening for May 15, 2023, at 7:00 pm; seconded by Chairman Maguire, MCU.

A discussion was held regarding changes to be made to the entrance at Linnippi Village as part of the road project which should take care of water draining from the Truck-Lite property running across the road causing erosion to the shoulder of the road by the dental office.
